

FITNESS HUB CRM

Salesforce-Powered Gym Management System

A comprehensive CRM solution for managing gym members, trainers, subscriptions, payments, attendance, and automated notifications.

Platform	Salesforce CRM
Language	Apex Programming Language
Tools	Flow Builder, Process Builder, Email Services
Environment	Salesforce Developer Org

Developed using Salesforce Developer Org | Apex | Flow Builder | Process Builder

1. Aim

To develop a Fitness Hub CRM system using Salesforce CRM for managing gym members, trainers, subscriptions, payments, attendance, and automated notifications.

2. Objectives

- To automate fitness center operations.
- To manage member records digitally.
- To automate membership renewal and notifications.
- To improve customer engagement and reporting.

3. Requirements

Software Requirements

Software	Purpose
Salesforce CRM	Primary CRM platform for the system
Salesforce Developer Org	Development and testing environment
Apex Programming Language	Backend logic and triggers
Salesforce Flow Builder	Workflow automation
Process Builder	Automated process management
Email Services	Automated notification delivery

Hardware Requirements

Hardware	Purpose
Computer / Laptop	For development and administration
Internet Connection	Required to access Salesforce cloud services
Web Browser	Interface to Salesforce Developer Org

4. System Design

4.1 Modules

- Member Management
- Trainer Management
- Subscription Management
- Attendance Tracking
- Payment Management

- Notification System
- Reporting Dashboard

4.2 Data Model Design – Standard Objects

Object	Purpose
Contact	Stores member personal details
Account	Stores organization / gym details
Opportunity	Tracks membership sales
Task	Manages follow-up activities

4.3 Custom Objects

Object	Purpose
Member	Stores all member information
Trainer	Stores trainer details and assignments
Subscription	Manages membership plans
Attendance	Tracks daily attendance records
Payment	Records and validates payment details

4.4 Key Fields per Object

Object	Key Fields
Member	Name, Membership Type, Expiry Date
Trainer	Name, Specialization, Assigned Members
Subscription	Plan Name, Start Date, End Date, Amount
Attendance	Member, Attendance Date, Status
Payment	Member, Amount, Payment Date, Status

4.5 Relationships

Parent Object	Child Object	Relationship Type
Member	Subscription	Master-Detail
Member	Attendance	Master-Detail
Trainer	Member	Lookup
Member	Payment	Lookup

5. Procedure

Step 1: Create Salesforce Developer Account

- Login to Salesforce Developer Org.
- Open the Setup Menu and configure the environment.

Step 2: Create Custom Objects

- Create: Member, Trainer, Subscription, Attendance, Payment.
- Add fields: Name, Membership Type, Expiry Date, Amount, Attendance Date.

Step 3: Define Relationships

- Create Master-Detail and Lookup relationships.
- Link Member with Subscription and Attendance.

Step 4: Create Flows

- Automate welcome emails using Salesforce Flow.
- Send membership renewal alerts.
- Update membership status automatically.

Step 5: Create Validation Rules

- Payment amount cannot be negative.
- Membership end date must be after start date.

Step 6: Create Reports & Dashboards

- Active members report.
- Expired memberships report.
- Monthly revenue report.
- Attendance statistics dashboard.

6. Automation

Salesforce Flow	Membership renewal reminders Trainer assignment automation Attendance alerts
Workflow Rules	Email notifications on events Auto field updates on status change
Apex Trigger	Payment validation logic Auto invoice generation on payment

7. Security Implementation

Roles

Admin
Trainer
Receptionist
Member

Security Features

Feature	Description
Profiles	Define user permissions at the object level
Permission Sets	Grant additional permissions to specific users
Sharing Rules	Control record-level access between roles
Field Level Security	Restrict visibility of sensitive fields
Two Factor Authentication	Added login security for all user roles

8. Testing

Test Case	Expected Result
New member registration	Member record successfully created in the system
Membership expiry	Automated reminder email sent to the member
Payment update	Payment status updated and reflected on record
Attendance marking	Attendance entry stored with date and status

9. Result

The Fitness Hub CRM system was successfully developed using Salesforce CRM. The system incorporates comprehensive automation through Salesforce Flow, Workflow Rules, and Apex Triggers. Security is enforced through Profiles, Permission Sets, Sharing Rules, Field Level Security, and Two-Factor Authentication. Reporting dashboards provide real-time visibility into active memberships, revenue, and attendance. The system effectively automates all fitness center operations, improves member record management, streamlines membership renewals, and enhances overall customer engagement.
